FABRIC GUIDE

Use our fabric guide to help you select the optimal Bulwark® fabric for any situation. Our comprehensive range of industry-leading options guarantees a perfect fit for a wide variety of industrial applications.

iQ SERIES®

iQ Series® products shift our collective mindset from the garment to the wearer and are designed to solve real-world problems. From the yarn blending to the fabric finishing, this product is created by a team of professionals with a hands-on approach. iQ products are created from blends of high performance fibers incorporated into superior fabrics. They are available in a variety of weights and are designed to achieve multiple industry standards.

EXCEL FR®

100% COTTON. 100% COMFORT.
100% FLAME-RESISTANT.

EXCEL FR® cotton garments offer unbeatable protection for foundries, flame cutting and welding, as well as electrical utilities and the chemical, oil, gas and petrochemical industries. All EXCEL FR® cotton apparel is permanently treated to guarantee flame resistance for the life of the garment.

EXCEL FR® COMFORTOUCH®

COTTON'S COMFORT. NYLON'S DURABILITY.

This practical 88% Cotton/12% Nylon blend provides long-lasting protection for nearly all work environments. Ideal applications include ferrous metals, electrical utilities and the chemical, oil, gas and petrochemical industries. Every EXCEL FR® ComforTouch® garment is engineered to provide flame resistance for the life of the garment.

NOMEX® ESSENTIAL

LIGHTWEIGHT. BREATHABLE.
INHERENTLY FLAME-RESISTANT.

DuPont Nomex® Essential (93% Nomex® Aramid/ 5% Kevlar® Aramid/2% Anti-Static Fiber) garments are extremely durable. Nomex® Essential apparel is preferred by workers in petrochemical and refinery environments and makes a great choice for electric and gas utility workers.

HI-VISIBILITY FR

FLAME-RESISTANT. COMFORTABLE. COMPLIANT.

Bulwark® offers garments designed to provide additional wearer safety during periods of limited visibility or in the often complex and varying backgrounds found in many occupations such as traffic control, construction and utility work along roadways and equipment operation.

HI-VISIBILITY RAINWEAR

BE SAFE. BE DRY. BE SEEN.

Flame-resistant rainwear from Bulwark® provides an effective barrier against rain and wind. Extra confidence comes from knowing these garments will not melt, drip or burn when exposed to an electrical arc or flash fire.

MOLTEN METAL® PROTECTION

SHED MOLTEN ALUMINUM. CAST OFF CRYOLITE.

Because of its unique ability to shed molten aluminum as well as cryolite, specialized Molten Metal protective garments are used extensively throughout the aluminum casting industry. Our products are inherently flame-resistant, so their ability to protect will never be compromised by laundering.

FR DISPOSABLES

PROTECT OTHER GARMENTS.
PREVENT CONTAMINANT SOILING.

Sontara® Extend FR garments are water-repellent and made to withstand minor splashes without saturation to garments underneath. Use them to extend the life of more expensive thermal protective garments.

ELECTRICAL SWITCHING CLOTHING

PROTECTION FOR MAXIMUM EXPOSURE.

For employees installing, maintaining or repairing high-voltage electrical systems, Bulwark's 40 cal/cm^2 electrical switching coat, bib and hood with face shield provide protection from extreme electrical arc risks.

ICON LEGEND

Throughout the catalog, you will notice different icons in the product descriptions for our garments. The icons help you quickly determine new products, CAT protection, NFPA® 2112 Compliance and ISO/EN certification.

NEW!

NEW PRODUCT FOR 2024

ARC RATINGS

Short sleeved FR shirts are not intended to be worn as single layer protection because they do not fully cover potentially exposed areas as completely as possible.

1 CAT

CATEGORY 1 PROTECTION

Arc-rated FR long-sleeve shirt and FR pants or FR coverall with a required minimum Arc Rating of 4 cal/cm^2.

2 CAT

CATEGORY 2 PROTECTION

Arc-rated FR long-sleeve shirt and FR pants or FR coverall with a required minimum Arc Rating of 8 cal/cm^2.

3 CAT

CATEGORY 3 PROTECTION

Arc-rated FR long-sleeve shirt and FR pants or FR coverall, arc flash suit, balaclavas etc. selected so that the system arc rating meets a required minimum Arc Rating of 25 cal/cm^2.

4 CAT

CATEGORY 4 PROTECTION

Arc-rated FR long-sleeve shirt and pants or FR coverall, and arc flash suit selected so that the system arc rating meets a required minimum Arc Rating of 40 cal/cm^2. CAT4 outerwear is not equivalent to 40 cal switching gear/flash suit and does not offer equivalent protection to workers engaged in switching and/or similar activities.

100

CP 100 PROTECTION

Garments that provide repellency for a low level of liquid chemical splash protection. They repel many but not all acids, corrosives, oxidizers and polar organic solvents[1], that typically have medium to high surface tension and medium to high polarity. Their application is only for inadvertent liquid chemical-splash of small volumes at atmospheric pressure. Garments that provide repellency for a low level of liquid chemical splash protection.

UL CERTIFIED

NFPA® 2112 COMPLIANT

Bulwark® Protective Apparel offers flame-resistant protective garments that are certified by UL to meet the requirements of NFPA® 2112 Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposure from Fire. NFPA® 2113 Standard on Selection, Care, Use, and Maintenance of Flame-Resistant Garments for Protection of Industrial Personnel Against Short-Duration Thermal Exposure from Fire, requires that garments cover the upper and lower body and flammable underlayers as completely as possible. Bulwark® garments meet this requirement either as a single garment such as a coverall or when worn with another certified garment such as a shirt or pants to provide both upper and lower body coverage.

CE

Some Bulwark FR garments have been designed according to EU Regulation 2016/425 and specifically to the European Standards ISO 13688: 2013 (General Requirements for Protective Clothing), EN ISO 11611: 2015 (Protective Clothing for welding and associated activities), EN ISO 11612: 2015 (Protective Clothing for Industrial Workers exposed to heat and flame), and IEC 61482-2: 2018 (Protective Clothing against the thermal hazards of an electric arc) to the referenced performance levels. EU Type examination by a Notified Body has proven that the clothing meets the fundamental requirements as described in the European EU Regulation 2016/425. The CE mark is the visible sign of our compliant PPE.

WASH CODES

Do not use bleach, hydrogen peroxide, starch or fabric softeners on any Bulwark garment. Please visit bulwark.com for complete laundry instructions.

IL-HS

INDUSTRIAL LAUNDER - HEAVY SOIL: This method of laundering is commonly used to remove heavy soil with a combination of higher water temperature (160° F max) and harsher chemistry. pH should be held to 11.5 max. More aggressive wash formulas may be necessary to remove heavy soils but may result in accelerated color loss, deterioration in performance of retroreflective trim and overall reduced garment service life.

IL-LS

INDUSTRIAL LAUNDER - LIGHT SOIL: This less aggressive (industrial) laundering process is commonly used on uniforms which are lightly soiled or made of fabrics that are not designed to withstand higher wash temperatures or harsher chemistry. In a typical light soil formula, water temperatures are usually held to a maximum of 140° F and pH to 10.5 max.

HW

HOME WASH: A laundering process normally defined as washing in a residential type top- or front-loading unit followed by tumble drying. Detergents used in this process are formulated for home use and are readily available on the consumer market.

[1]See bulwark.com/labs-and-material-handling.html for more information including a technical brief with a list of chemicals that have been tested.

Bulwark® FR

iQ SERIES®

The industry's ongoing call for smarter FR deserves a revolutionary response. The Bulwark® iQ Series®. Every iQ garment is the product of a new way of thinking: Design to solve real world FR problems uncovered from first-hand, real-wear insights. Then employ the latest scientific advancements and fabric technologies to bring those designs to life. The future of FR is here. And it's brighter than ever before.

SINCE '71

iQ SERIES®
COMFORT COLLECTION

Let's be honest, "comfort" isn't exactly the first word that comes to mind when most people in the safety industry think of FR. The iQ Series® Comfort Collection set out to change that, by combining revolutionary design features with lightweight and breathable fabrics to make this collection the most comfortable FR on the market. Because the job isn't always comfortable, but that doesn't mean your FR workwear can't be.

QT15KH

iQ SERIES® WOMEN'S COMFORT KNIT POLO WITH 4-BUTTON PLACKET

NFPA® 2112 Compliant

Revolutionary FR workwear designed for women. The QT15 polo is designed for fit and comfort, with FR compliance, of course. The 4-button placket allows you to button all the way up for maximum safety, or unbutton when you're out of the line of fire. Shirring at the back of this shirt, with a two-ply yoke creates a feminine silhouette, and the concealed rib knit cuffs stay in place all day long.

iQ SERIES®
ENDURANCE COLLECTION

FR workwear won't pass muster if it doesn't last. The iQ Series® Endurance Collection is a line of durable FR without the tradeoffs and compromises traditionally associated with durability. iQ's revolutionary dual elemental protection penetrates FR chemistry deep into the fiber of the fabric without adding weight, while the addition of polyester improves strength and overall durability, so you can be confident your FR protection will last every bit as long as you do.

Color: Yellow/Green (HV)

HV

HI-VIS ICON LEGEND

HI-VIS ROADWAY TYPE R CLASS 2

Intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 2 garments require the use of greater amounts of hi-visibility materials than Class 1 apparel, which help distinguish between a human and an inanimate object.

HI-VIS ROADWAY TYPE R CLASS 3

Intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 3 garments mandate the greatest amount of hi-visibility material for workers in moving, complex backgrounds, including reflective striping on sleeves and pant legs (if present).

HI-VIS SUPPLEMENTAL CLASS E

Pants, bib overalls, shorts and gaiters meeting minimum area requirements for background material and retroreflective trim. Class E apparel, however, cannot be worn alone to provide adequate visibility of workers. When Class E items are worn with Performance Class 2 or Class 3 apparel, the overall classification of the ensemble is Performance Class 3.

CMD8HV

1. **ONE-PIECE, TOPSTITCHED, LAY-FLAT COLLAR**

SINCE '71

FLAME RESISTANT (FR)/ CHEMICAL-SPLASH PROTECTION (CP)

These FR/CP garments bring together the latest innovations in chemical protection safety to protect wearers against multiple hazards. Flame resistant fabric prevents clothing ignition during short-duration thermal exposures. FR/CP garments also repel small amounts of liquid chemicals that are either dropped or splashed on the fabric, resisting penetration and wicking of an inadvertent, secondary liquid chemical-splash. They are also lightweight, breathable and comfortable to wear. Not only are they lightweight and easy to wear, but they also have a finish that does not contain any intentionally added PFAS.

MEN'S FLAME RESISTANT (FR) / CHEMICAL-SPLASH PROTECTION (CP) PREMIUM COVERALL

NFPA® 2112 Compliant

Black stand up collar with concealed snap at neck. Action back. Two-way, concealed, Nomex® tape, brass, break-away zipper. Elastic waist. Snapped wrist closure. FLAME RESISTANT (FR)/ CHEMICAL-SPLASH PROTECTION (CP)

These FR/CP garments bring together the latest innovations in chemical protection safety to protect wearers against multiple hazards. Flame resistant fabric prevents clothing ignition during short-duration thermal incidents and emergency exposure to flame. FR/CP garments also repel small amounts of liquid chemicals that are either dropped or splashed on the fabric, resisting penetration and wicking of an inadvertent, secondary liquid chemical-splash. They are also lightweight, breathable and comfortable to wear. Not only are they lightweight and easy to wear, but they also have a finish that does not contain any intentionally added PFAS.

MEN'S & WOMEN'S FLAME RESISTANT (FR) / CHEMICAL-SPLASH PROTECTION (CP) LAB COATS

NFPA® 2112 Compliant

Concealed snap-front closure. Black lay flat collar for easy recognition as a CP lab coat. FR-only knit cuffs – safer than typical open cuff. Splash-resistant pass-throughs for easy inner pocket access. Pockets include one two-needle top-stitched chest pocket with pencil stall and two two-needle top-stitched lower pockets with flaps. KNR7 features tailored fit specifically for women.

HIGH / ENHANCED VISIBILITY RETRO-REFLECTIVE TRIM

Increased worker visibility can be critical when working in high-traffic areas, around equipment operations or within environments where it is crucial to be seen. Adding striping to your uniform can make a life-saving difference. The American National Standard for High-Visibility Safety Apparel is ANSI/ISEA 107. This standard specifies performance requirements including the type, location and minimum area of the retro-reflective trim, as well as the color, physical properties and minimum area of the fabric used in the construction of high-visibility garment. These performance requirements have been developed by industry experts to provide visibility of wearers in a variety of situations. We recommend following these requirements whenever possible, based on your hazard assessment. ANSI-ISEA 107 compliant garments can be found on pages 40-52.

Simply enhancing your uniform by adding retroreflective striping can also be helpful in providing improved visibility of workers. Select from many trim options, colors and placement to meet your specific worker visibility needs. This distinctive striping can be added to most Bulwark® garments. Flame-resistant striping is always used, for FR garments. The garments and striping you select should depend on the end use requirements and the method of laundering used on the garments.

Above are examples of how a plain stocked garment can be customized with three of our most popular striping configurations. With a few exceptions, stripes shown above the waist can be applied to a shirt, jacket or coverall. Stripes shown below the waist can be applied to a pant or coverall. The specific details of a garment, like the size of a pocket, the placement of closures, an emblem or an additional pocket, may dictate a slight change in the placement from what is shown in these images. Striping applied post-manufacturing will always go around a pocket or emblem. Pockets cannot be removed for reflective trim application. Stripes on a waistband will be moved up or down if the waistband has elastic sections.

Through our Imagine It® program, we have taken the capability of creating customized uniform items and apparel to a new level. Visualize it... create it... and we'll produce it. This unique program allows you to select stock apparel and modify or customize them to create uniforms that cater directly to your customer's needs. This allows many customers to purchase similar items while maintaining individual expression.

SLW2LB

EMBROIDERY & EMBLEMS

Customize your Bulwark® garments by adding a company logo or employee name and department with direct embroidery or emblems.

Thread colors are from A & E Signature threads. They have excellent color retention with a high luster finish, are strong to prevent breakage, and have very good abrasion resistance that will stand up to the rigors of industrial washing. To preserve the flame-resistant qualities of the apparel, minimize the size and number of non-FR emblems applied to a garment.

TOOLS TO GET YOU STARTED:

IMAGINE IT ONLINE CATALOG

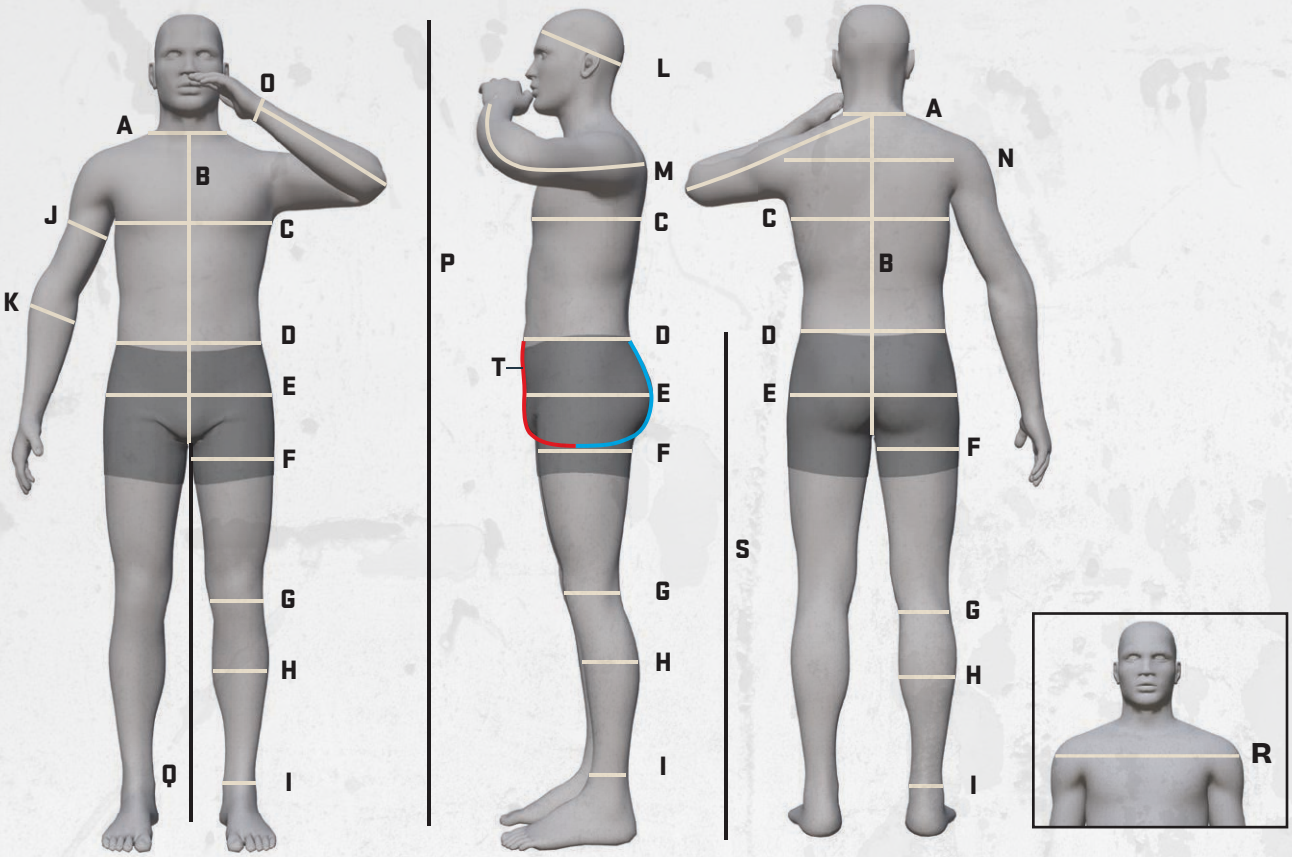

You can find our online customization catalog at wpg.wwof.com/Information/ImagineIt. The catalog shows you a quick glance of over 100 embroidery thread color options. There is also a section outlining placement of reflective trim along with the different color options and sizes available.

MEN'S MEASUREMENTS

WOMEN'S MEASUREMENTS

A - NECK
Measure around the base of your neck where a collared shirt would fit; or measure a collarband of a shirt that fits you well. Lay the collarband flat. Measure from the beginning of the buttonhole to the center of the button.

B - TRUNK
Measure from the base of the neck (front) down around the crotch and back up to the bottom of the collar. For coveralls only - see Diagram.

C - CHEST / BUST
Measure at the fullest part of your chest / bust. Hold the tape firmly, but not tightly. Be sure the tape is level and straight across your back. Stand naturally with your arms down by your side.

D - WAIST / MID SECTION
First, remove your belt. Then measure over shirt (not over pants) at the position you normally wear your pants. Hold the tape firmly, but not tightly. Note - For shirts and coveralls, measure the largest portion of the mid-section.

E - HIPS
Stand with your heels together. Measure around the fullest part of the hips. Hold the tape measure straight and level.

F - THIGH
Measure the circumference of the upper leg close to the crotch (approximately 1" below crotch).

G - KNEE
With the leg straight, measure the knee circumference over the knee cap and parallel to the floor.

H - CALF
Measure the circumference of the largest part of the lower leg approximately half way between the knee and ankle and parallel to the floor.

I - ANKLE
Measure the ankle circumference over the ankle bone and parallel to the floor.

J - UPPER ARM / BICEP
Measure the maximum circumference of the upper arm just below the underarm.

K - FOREARM
Measure the maximum circumference of the forearm at approximately 6" above the wrist.

L - CAP / HAT SIZE
Measure the circumference of the head at its widest diameter, approximately 1/8" above the ears.

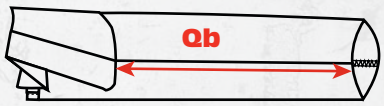

M - SLEEVE
Bend the elbow as shown (see M). Start at the center back neck and measure across shoulder to the elbow and down to the wrist bone.

N - ACROSS SHOULDER
While standing with arms down, measure across the back from one shoulder joint to the other.

O - WRIST
Measure the wrist circumference over the wrist bone.

P - HEIGHT
Stand straight against a wall without your shoes. Make a mark level with the top of your head. Measure from this point down to the floor.

Q - INSEAM
Standing straight, measure the distance from the crotch to just below the ankle bone. **Or** - using similar style pants that fit you well; lay garment flat and with the front and back creases smooth. Measure the inside seam of one leg from the bottom of the hem to the crotch (see Qb).

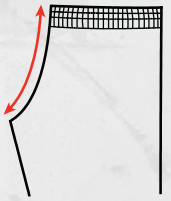

R - OVERARM (BLAZERS)
With arms at the sides, measure around the broadest part of the shoulders and upper arms, keeping the tape level at all times. If overarm is more than 7" larger than the chest, go up one size.

S - OUTSEAM
Measure along the outside of the leg from the top of the waistband to the bottom of the hem or just below the ankle bone.

Sa - OUTSEAM ON GARMENT
On an existing garment: lay garment flat, measure along the outseam from the top of the band to the bottom hem.

T - FRONT AND BACK RISES
Front - this is the distance from the center front at the top of the waistband to the intersection of the crotch seam.
Back - this is the distance from the center back waistband to the intersection of the crotch seams.

POLICY STANDARD TERMS & CONDITIONS OF SALE

Please refer to our website at www.bulwark.com for Standard Terms and Conditions of Sale, or call:

USA: 1-800-223-3372
Canada: 1-800-667-0700
Distributors: 1-800-733-5271

INVENTORY & CATALOG UPDATES

Not all sizes for a particular garment identified in this catalog are maintained in inventory. Upon receipt of your order, you will be provided an estimated shipping date.

PRODUCT RETURNS

For latest information, visit our website at www.bulwark.com. Prior authorization for returns may be obtained by calling Customer Care: USA: 1-800-223-3372 and Canada: 1-800-667-0700. For Distributors, call 1-800-733-5271.

PAYMENT TERMS

Refer to Standard Terms and Conditions of Sale.

CUSTOMIZATION

Bulwark® offers several options for customizing your garments from stock. See your Bulwark® Product Guide or inquire for details on pricing.

HEMMING

Refer to your Bulwark® Product Guide. For latest information visit our website at www.bulwark.com.

GARMENT CARE

Refer to the care label in your Bulwark® apparel. For latest information, visit our website at www.bulwark.com.

PRODUCT SPECIFICATIONS

All trademark and logos shown in this catalog are for the product illustration only and are not available to a customer, nor are they an endorsement by or for any person or other entity. At time of order, please provide the appropriate proof of authorization for your use of trademark's copyrights, patents and other intelleuctual property.

Bulwark garments are not intended for fire entry, structural or wildlands fire fighting activities and, unless otherwise indicated, provide no protection from chemical exposures. They should be removed at once if fouled with flammable material. To prevent generation of potentially hazardous static electricity, do not don or remove any garments in a hazardous area.

Bulwark® garments are not intended for personal, family or household use as defined in the Manguson-Moss Warranty Act, 15 U.S.C. 2301-2312. For latest information, visit our website at www.bulwark.com.

ARC RATINGS

Arc ratings published in this catalog are supplied to us by our fabric suppliers or are the result of our own arc testing. An arc rating can be reported in cal/cm^2 as either ATPV or E_{BT} and is the incident energy at which there is 50% probability of occurrence of a second degree burn or of fabric breakopen, respectively. As with all tests, some level of variation in test results is normal and expected among fabrics of identical fiber content and nominal weight. In order to assist end users with their hazard analysis by providing the most conservative arc rating, Bulwark® will publish the lowest arc rating for that fabric weight in our catalog and on our garment label.

Bulwark® garments are designed for continuous wear. They meet applicable standards such as NFPA® 2112, Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire, ASTM F2302, Standard Performance Specification for Labeling Protective Clothing Which Provides Resistance to Incidental Exposures to Heat or Open Flame, National Fire Protection Association (NFPA®) Standard 70E, Standard for Electrical Safety in the Workplace, ASTM F1506, Standard Performance Specification For Flame Resistant And Electric Arc Rated Protective Clothing Worn By Workers Exposed To Flames And Electric Arcs. Refer to individual garment labels to confirm compliance with specific performance standards. Because these fabrics are flame-resistant, they are acceptable under the Occupational Safety & Health Administration (OSHA) Final Rule 1910.269. Final Rule on Electrical Protective Equipment. For complete information on these products, as well as laundering instructions, please visit bulwark.com.
