The additional body measurements given will set expectations for all consumers on how the bodies we designed the product for might vary from their own, including those wanting or needing to purchase across gender.

HOW TO MEASURE

Bust: Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

Natural Waist: Bend side to side and find the natural bend in your body; this is your natural waist. **Note:** It may not be the smallest point.

Hips: Measure the fullest part of your hips, approximately 8" below the natural waist.

For best results, measure over your undergarments.

HOW TO MEASURE

Chest: Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

Natural Waist: Bend side to side and find the natural bend in your body; this is your natural waist. Note: It may not be the smallest point.

Hip/Seat: Measure the fullest point between your natural waist and crotch.

For best results, measure over your undergarments.
