WOMEN'S BODY MEASUREMENTS

We have updated our sizing charts to more accurately reflect the body standards we build our product to fit, removing ambiguous ranges. The body standards we build product for have not changed, nor has the product. The information update will help to better navigate the Carhartt sizing systems and products. The additional body measurements given will set expectations for all consumers on how the bodies we designed the product for might vary from their own, including those wanting or needing to purchase across gender.

BODY MEASUREMENTS

Our Women's Alpha-sized, Regular Length products are built for a body that measures:

	XS (0-2)	S (4-6)	M (8-10)	L (12-14)	XL (16-18)	2X (20-22)
Chest	33"	35"	37"	41"	45½"	50"
Natural Waist	27"	29"	31"	35"	39¾"	44¾"
Low Hip	36"	38"	40"	44"	48¼"	52½"
Arm Length - CB Neck to Wrist	29½"	30¼"	30½"	31"	31⅝"	31¾"
Inseam	29¾"	28¾"	29½"	30¼"	31"	31¾"

HOW TO MEASURE

Bust:

Measure the fullest part of your bust, keeping the measuring tape parallel to the floor.

Natural Waist:

Bend side to side and find the natural bend in your body; this is your natural waist.

Note: It may not be the smallest point.

Hips :

Measure the fullest part of your hips, approximately 8" below the natural waist.

Inseam :

Measure from your crotch down to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. To get the inseam length, measure on the front from the crotch point, along the seam, to the hem.

For best results, measure over your undergarments.

NOTE: If your measurement falls between sizes, buy the larger size.

HOW TO MEASURE

Chest:

Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

Natural Waist:

Bend side to side and find the natural bend in your body; this is your natural waist. Note: It may not be the smallest point.

Hip/Seat:

Measure the fullest point between your natural waist and crotch.

Inseam:

Measure from your crotch to the desired length on body. You may also measure pants that you currently own and like. Lay the garment flat and smooth out. Measure on the front from the crotch point along the seam to the hem for the inseam length.

For best results, measure over your undergarments.
